INSTRUCTIONS FOR AREA WHERE GRAFT WAS TAKEN FROM

Donor site location: _____

DONOR SITE SUTURED

1. Bulky pressure dressing to remain intact for 24 hours.
2. After 24 hours remove the bulky bandages. Leave the flat dressing on your skin until the dressing is removed approximately 7 days following surgery.
3. Original piece of tape to remain intact until the sutures are removed. If the tape becomes loose, reinforce it with another piece of tape.

DONOR SITE, NATURALLY HEALING WOUND

1. Bulky dressing to remain intact for 24 hours.
2. After 24 hours remove the dressing and clean with soapy water, using a gauze pad... soak for approximately 5 minutes.
3. Dry with a sterile gauze pad. **Apply Polysporin, Bacitracin, Aquaphor, or Vaseline** (all of which can be purchased over the counter) over the entire wound, cover the wound with a telfa dressing pad and micropore tape (paper tape) Continue daily for 2 - 3 weeks or until the wound heals.

IN CASE OF EMERGENCY:
